Anhang Tonartentabelle

1. Bestimmungsgemäße Verwendung

Schallgeber der PA- Serie sind für die Signalisierung von z.B. Gefahrzuständen in Industrie, Gewerbe und Gebäudebereichen bestimmt. Bei Nutzung der Schallgeber-Signalleuchten-Kombination (PA L 1-R) besteht zusätzlich die Möglichkeit der optischen Signalisierung.

Die Schallgeber erzeugen akustische Signale in 70 verschiedenen Tonarten, die mit Hilfe eines internen Schalters ausgewählt werden können. Es besteht die Möglichkeit, durch externe Ansteuerung auf maximal 3 weitere Töne umzuschalten.

Die Geräte nur in unbeschädigtem Zustand innerhalb der spezifizierten Kenndaten betreiben. Die Funktion des Gerätes ist nur gewährleistet, wenn Ober- und Unterteil korrekt zusammengefügt sind.

Die Geräte sind für den Einsatz im Innen- und Außenbereich geeignet.

2. Lieferumfang

Der Lieferumfang besteht aus:

1x Signalgerät

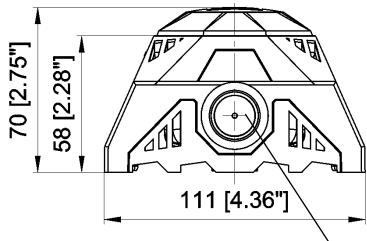

1x Membrannippel M20 (*Optional: Kabelverschraubung - M12-Stecker*)

1x Dichtung für untere Kabeldurchführung

1x Kurzanleitung

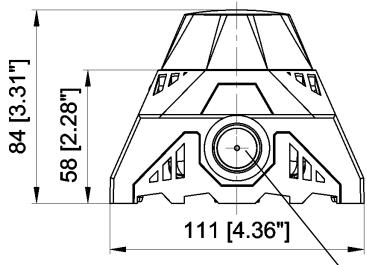

3. Abmessungen

4. Technische Daten

4.1 Allgemein

	PA 1-R	PA L 1-R
Lichtstärke	-	16 cd (klar)
Leuchtmittel	-	20x RGBW
Farben RGBW-LED	-	blau, rot, grün, gelb, orange, violett, magenta zusätzlich über externe Ansteuerung: weiß
Max. Schallpegel	105 dB (A) @1m, DIN-Ton (Ton-Nr. 2)	
Lautstärkeregelung		max. - 20 dB
Töne		70
Einschaltdauer		100%
Anschlussklemmen	0,14 - 1,5mm ² feindrähtig/ eindrähtig / AWG24 - AWG 14	
Schutzart		IP 66 (EN 60529), Type 4 & 4x
Schlagfestigkeit	IK08	IK07
Schutzklasse		II
Betriebstemperatur	-25 °C...+50 °C (UL-Zulassung siehe Seite 3, englischsprachiges Kapitel)	
Lagertemperatur		-25°C...+70°C
Max. rel. Luftfeuchte		90%
Kabeleinführung	1x M20 vorgeprägt, 1x 10mm vorgeprägt	
Dichtbereich der Durchführungsstüle	7 – 13 mm	Bei Verwendung von Kabeldurchmessern < 7 mm eine Kabelverschraubung mit ausreichender Schutzart vorsehen
Gehäusematerial		PC / ABS
Haubenmaterial	PC/ABS	PC Makrolon
Einbaulage		beliebig
Haubenfarben	--	klar, weiß, gelb, orange, rot, grün, blau RGBW-Version: weiß

4.2 Elektrische Kenndaten AC-Version / DC-Version

	PA L 1-R					
Bemessungsspannungsbereich (Begrenzung siehe Zulassung)	12V - 48V DC			24 - 48V AC 50/60Hz	115V - 230V AC 50/60Hz	
Arbeitsspannungsbereich	10V - 60V DC			18V – 53V AC	95V - 253V AC	
	12V DC	24V DC	48V DC	24V AC	48V AC	115V AC
Bemessungsstromaufnahme Leuchte (max)	450 mA	210 mA	115 mA	210 mA	115 mA	100 mA
Bemessungsstromaufnahme Schallgeber (max)	375 mA	170 mA	100 mA	245 mA	175 mA	70 mA
Leistungsaufnahme (max)	9,9 W	9,2 W	10,4 W			46 mA
	PA 1-R					
Bemessungsspannungsbereich (Begrenzung siehe Zulassung)	12V - 48V DC			24 - 48V AC 50/60Hz	115V - 230V AC 50/60Hz	
Arbeitsspannungsbereich	10V - 60V DC			18V – 53V AC	95V - 253V AC	
Bemessungsstromaufnahme (max)	12V DC	24V DC	48V DC	24V AC	48V AC	115V AC

Leistungsaufnahme (max)	4,5 W	4,1 W	4,8 W			46 mA

5. Zulassungen

(Zulassungen gelten für gekennzeichnete Geräte)

UL, cUL

In Vorbereitung

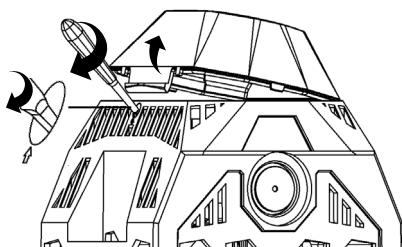

6. Inbetriebnahme

6.1 Sicherheitshinweise

	<p>GEFAHR - Lebensgefahr durch Stromschlag Spannungsführende Geräte und freiliegende Anschlussleitungen können Stromschläge erzeugen und schwere Unfälle verursachen.</p> <ul style="list-style-type: none"> ➤ Arbeiten an elektrischen Anschlüssen dürfen nur elektrotechnisch geschulte und autorisierte Fachkräfte durchführen. ➤ Vor der Montage alle Zuleitungen spannungsfrei schalten und gegen Wiedereinschalten sichern. Spannungsfreiheit immer sicherstellen. ➤ Entladungsphase von 5 Minuten für die elektrischen Komponenten abwarten. Erst danach Gerät öffnen. ➤ Das Anlegen der Betriebsspannung darf nur bei fest verschlossenem Gehäuse erfolgen.
	<p>WARNUNG - Gefahr durch unzulässigen Einsatz der Geräte Der nicht bestimmungsgemäße Einsatz kann zu schweren Unfällen führen.</p> <ul style="list-style-type: none"> ➤ Bei der Installation darauf achten, dass die Anschlussleitung gegen Zug und Verdrehen abgesichert ist. ➤ Die Geräte sind nur für die ortsfeste Montage bestimmt.
	<p>GEFAHR - Gefahr durch Beschädigung der Geräte Nichtbeachtung der Typenschild-Angaben kann zu schweren Unfällen führen.</p> <ul style="list-style-type: none"> ➤ Bei Installation und Wartung der Geräte immer die Angaben auf dem Typenschild beachten.
 	<p>VORSICHT - Verletzungsgefahr durch scharfe Kanten oder erhitzte Bauteile</p> <ul style="list-style-type: none"> ➤ Bei Installations-, Montage-, oder Service-/ Wartungsarbeiten geeignete Persönliche Schutzausrüstung (PSA) tragen. ➤ Verdrahtung entfernt von scharfen Kanten, Ecken und internen Komponenten vornehmen, Kollisionen mit Bauteilen vermeiden.
 	<p>VORSICHT - Beeinträchtigung des Sehvermögens</p> <ul style="list-style-type: none"> ➤ Um eine Beeinträchtigung des Sehvermögens zu verhindern, den dauernden, direkten Blick in die aktivierte Leuchte vermeiden. ➤ Unvermittelte Blitzauslösung kann zu Schreckreaktionen führen. <p>VORSICHT - Beeinträchtigung des Hörvermögens</p> <ul style="list-style-type: none"> ➤ Um eine Beeinträchtigung des Hörvermögens zu verhindern, bei Arbeiten/ Tests eine Schallschutzausrüstung tragen. ➤ Unvermittelte Schallauslösung kann zu Schreckreaktionen führen.

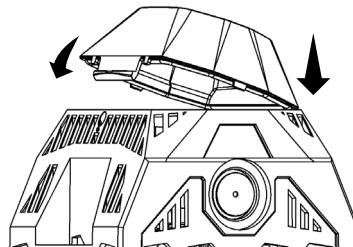

6.1 Haubenverschluss

Öffnen der Haube

Mit einem Schraubendreher (Klingenbreite 3mm) in die markierte Öffnung führen und durch eine Drehung um 90° den Deckel herausheben.

Verschließen der Haube

Haube auf das Gehäuse setzen (auf Verdrehschutz achten) und mit leichtem Druck schließen.

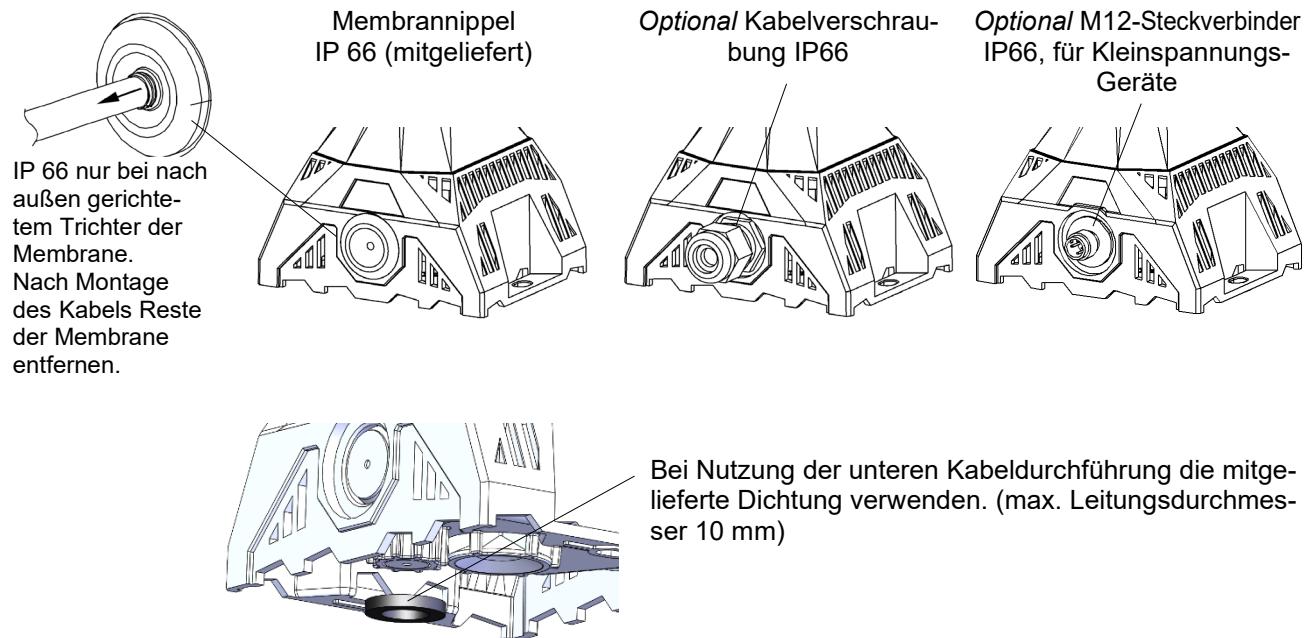

Das Gerät wird in nicht verschlossenem Zustand ausgeliefert.

Kabeldurchführungen

Der mitgelieferte Membrannippel kann durch eine Kabelverschraubung oder durch einen M12-Steckverbinder mit einem Flanschmaß von M20 ersetzt werden.

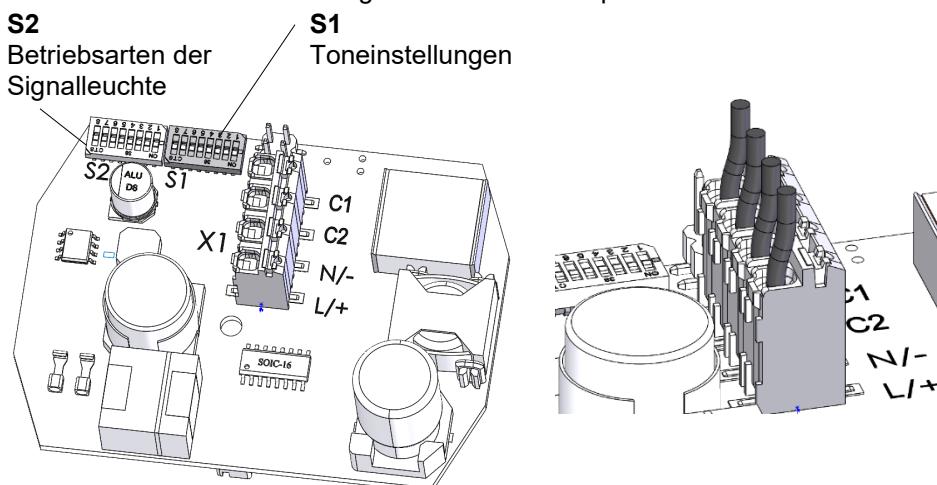

- Nur Kabelverschraubungen mit einer Schutzart von mindestens IP66 an den entsprechenden Durchbrüchen montieren.

Bei Kabeldurchmessern von <7 mm eine Kabelverschraubung mit ausreichender Schutzart verwenden.

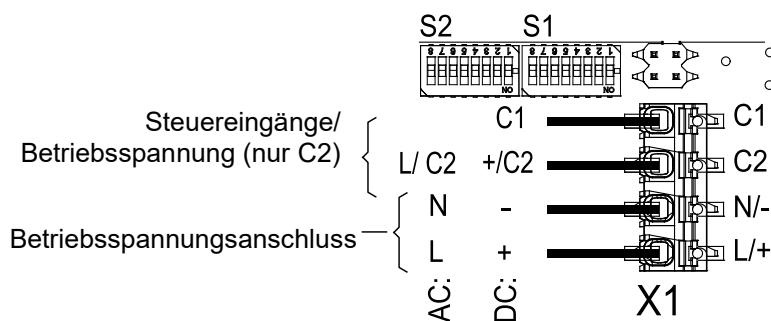

6.2 Elektrischer Anschluss/ Bedienelemente PA 1-R / PA L 1-R

Der elektrische Anschluss erfolgt auf der Anschlussplatine im Oberteil/ in der Haube.

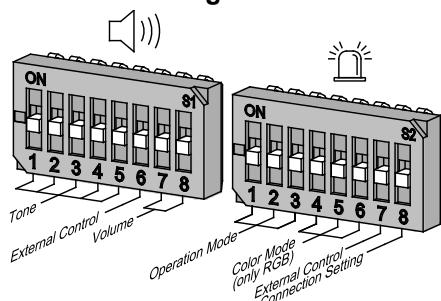

Die Anschlussdrähte werden in die dafür vorgesehenen Öffnungen nach dem push-in-Prinzip gesteckt.

6.3 Anschluss der Betriebsspannung

Bei Kombigerät PA L 1-R können Signalleuchte und Schallgeber zusammen oder separat versorgt werden.

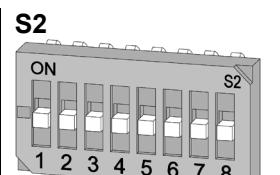

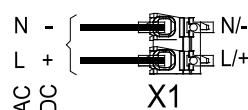

DIP-Schalterstellung S2 auf der Anschlussplatine wie folgt vornehmen:

9. Wartung, Service, Instandhaltung

- Bei allen Arbeiten am Gerät [Sicherheitshinweise](#) beachten.

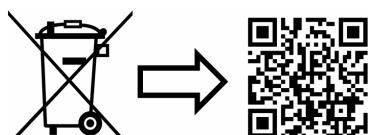

Das Gerät erfordert keine besondere Wartung.

- Für die äußere Reinigung keine abrasiven, lösungsmittelhaltigen oder chemisch aggressiven Reiniger verwenden.
Keine scharfkantigen Werkzeuge verwenden, insbesondere die Leuchthaube nicht zerkratzen.
Nicht mit Hochdruck reinigen.
- Austausch von Komponenten nur mit Originalersatzteilen.
- Reparaturen grundsätzlich nur im Herstellerwerk ausführen lassen.

Umbauten, Änderungen, fehlerhafter und unzulässiger Einsatz sowie die Nichtbeachtung der Hinweise dieser Betriebsanleitung schließen eine Gewährleistung aus.

10. Außerbetriebnahme, Demontage und Entsorgung

- Bei allen Arbeiten am Gerät [Sicherheitshinweise](#) beachten.

Annex tones table

1. Intended use

Sounders of the PA series are designed for the signaling of e.g. hazardous conditions in industry, trade and construction areas. There is also the possibility of visual signaling when the sounder-signal lamp combination (PA L 1-R) is used.

The sounders produce acoustic signals in 70 different tones, which can be selected using an internal switch. The external control can be used to switch over to a maximum of 3 further tones.

The devices must only be operated when undamaged and within the specified parameters. The function of the device can only be guaranteed if the upper and lower parts are correctly joined together.

The devices are suitable for indoor and outdoor use.

2. Scope of delivery

The scope of delivery consists of:

1x Signaling device

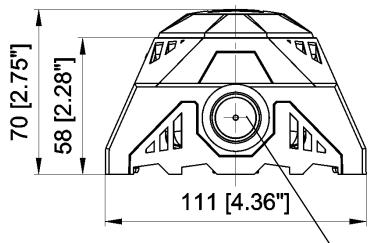

1x Diaphragm nipple M20 (*Optional: Cable gland - M12 plug*)

1x Seal for lower cable feed-through

1x Quick guide

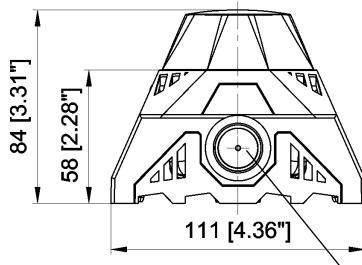

3. Dimensions

5. Approvals

(Approvals are valid for marked devices)

UL, cUL

In preparation

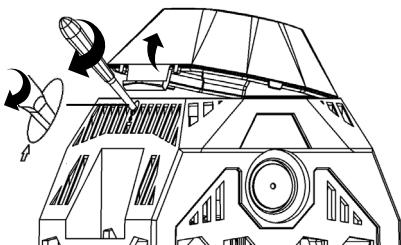

6. Commissioning

6.1 Safety information

	DANGER - Danger to life due to electric shock Voltage-carrying units and exposed connection cables may cause electric shocks and serious accidents. ➤ Only trained and authorized electricians may work on electrical connections. ➤ Disconnect all supply lines from mains before installation and secure them against reconnection. Always ensure absence of voltage. ➤ Wait for the discharge phase of 5 minutes for the electrical components. The unit should only be opened afterwards. ➤ The operating voltage must only be applied when the housing is firmly closed.
	WARNING - Danger due to unauthorized use of the devices Improper use may lead to serious accidents. ➤ Ensure that the connection cable is protected against pulling and twisting during installation. ➤ The devices are only intended for fixed assembly.
	DANGER - Danger due to damage to the devices Non-compliance with the information on the type plate can lead to serious accidents. ➤ Always observe the information on the type plate when installing and maintaining the units.
 	CAUTION - Risk of injury due to sharp edges or heated components ➤ Wear suitable personal protective equipment (PPE) for installation, assembly or service/maintenance work. ➤ Keep wiring away from sharp edges, corners and internal components; avoid collisions with component parts.
	CAUTION - Risk of sight impairment ➤ Avoid constant, direct glances into the activated lights to prevent impairment of vision. ➤ Unexpected triggering of the flash can lead to startled reactions.
	CAUTION - Risk of hearing impairment ➤ Wear sound insulation equipment during work/testing to prevent hearing impairment. ➤ Unexpected triggering of the sound can lead to startled reactions.

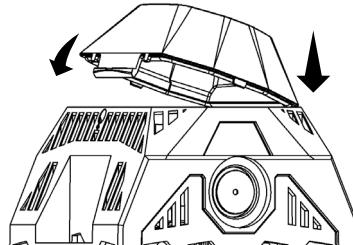

6.1 Lens cap

Opening the lens

Insert a screwdriver (3 mm blade width) in the marked opening and lever out the lid by turning 90°.

Closing the lens

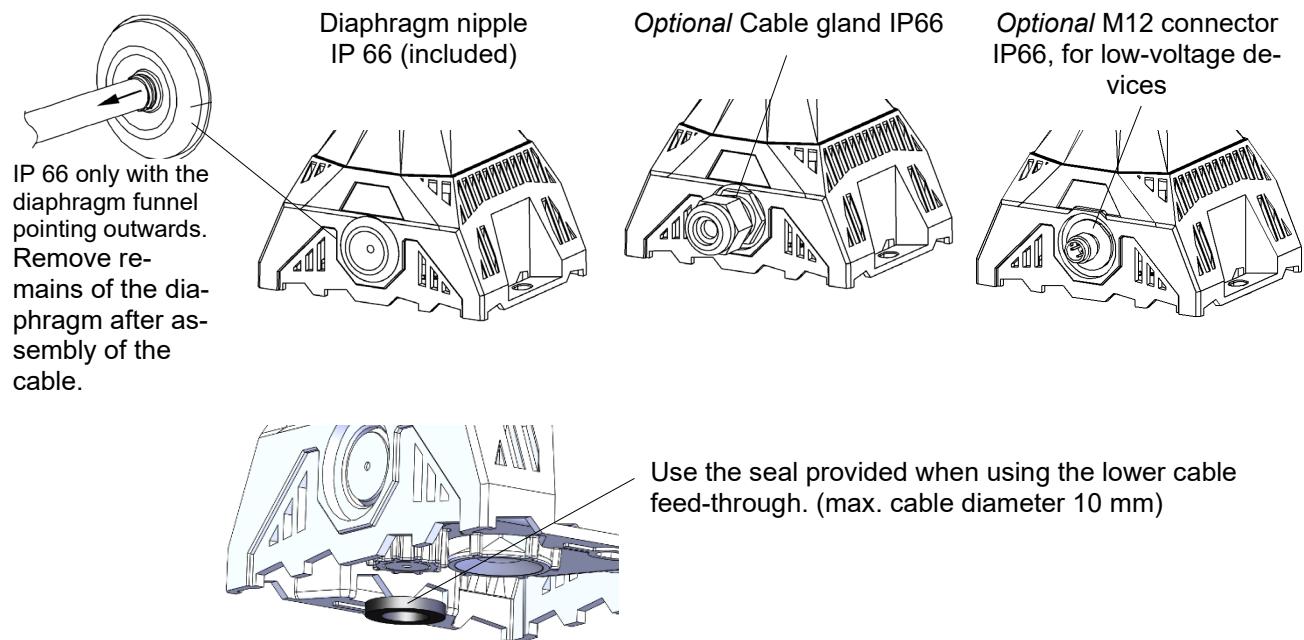

Place the lens on the housing (pay attention to anti-twist protection) and close with slight pressure.

The device is delivered in an unsealed condition.

Cable feed-throughs

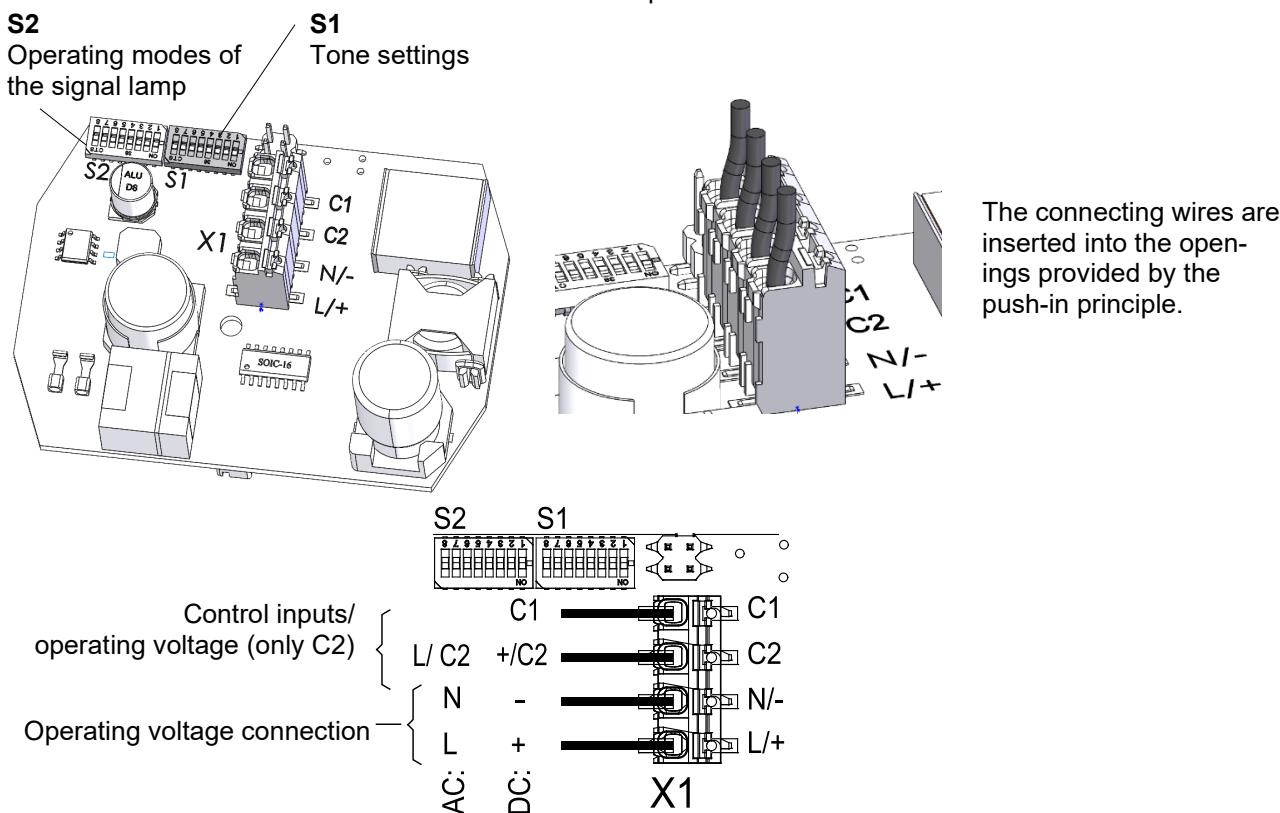

The supplied diaphragm nipple can be replaced by a cable gland or by an M12 plug-in connector with a flange dimension of M20.

- Only cable glands with protection category of at least IP66 should be fitted to the corresponding openings. Cable diameters of <7 mm require a cable gland with appropriate protection category.

6.2 Electrical connection/control elements PA 1-R / PA L 1-R

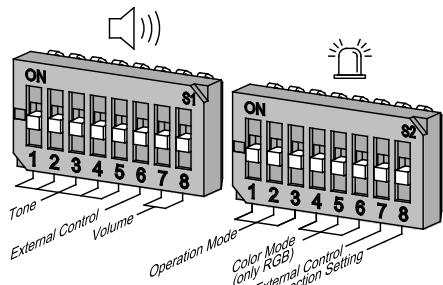

The electrical connection is made on the board in the top section/in the lens.

6.3 Connecting the operating voltage

Signal lamp and sounder can be supplied together or separately in the PA L 1-R combi-device.

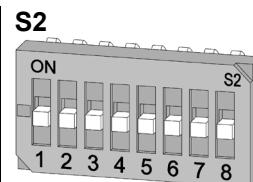

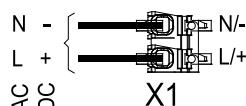

Set the DIP switch S2 on the board as follows:

Further information in the QuickGuide

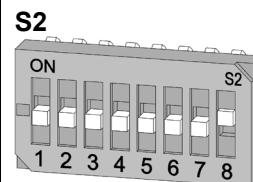

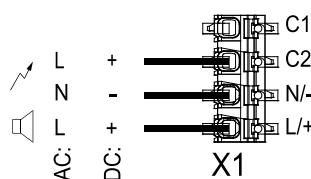

PA 1-R:
Connection of the operating voltage

PA L 1-R: Common supply of signal lamp and sounder

S2: all switches to OFF
Factory setting*

PA L 1-R:
Separate supply of signal lamp and sounder

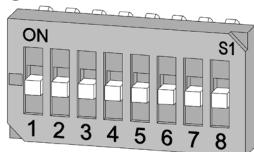

S2: Switch 8 to ON

6.4 Setting the operating modes without external control

6.4.1 Setting the tones

The tone is set using the **S1** switch on the board in the lens, see table below.

8. Accessories

Item No.	Designation
28912000001	Spare seal PA (L) 1-R

9. Maintenance, service, repairs

- Observe the [Safety](#) information during all work on the device.

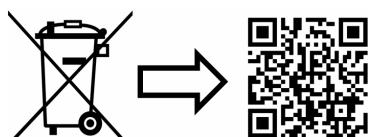

The device requires no special maintenance.

- Do not use abrasive, solvent-containing or chemically aggressive cleaners for cleaning the outside.
Do not use sharp tools; especially avoid scratching the lens.
Do not clean with high pressure.
- Only replace components using original spare parts.
- Only have repairs carried out at the manufacturer's premises.

Conversions, modifications, improper and impermissible use as well as failure to observe the notes in this operating instructions shall void any warranty.

10. Decommissioning, dismantling and disposal

- Observe the [Safety](#) information during all work on the device.

Annexe Tableau des sons

1. Utilisation conforme

Les sirènes de la série PA sont conçues pour la signalisation des situations dangereuses dans l'industrie, le commerce et le secteur du bâtiment. Il est également possible d'ajouter un système de signalisation visuelle dans le cas d'utilisation combiné de sirènes et de voyants lumineux (PA L 1-R).

Les sirènes génèrent des signaux sonores qui se déclinent en 70 sons différents. Ces sons peuvent être sélectionnés au moyen d'un commutateur interne. Il est possible de commuter jusqu'à 3 sons supplémentaires avec une commande externe.

Utiliser uniquement les appareils à condition que ceux-ci soient intacts et conformes aux caractéristiques spécifiées. Le fonctionnement de l'appareil n'est garanti que si les parties supérieure et inférieure ont été correctement assemblées.

Les appareils peuvent être utilisés à l'intérieur comme à l'extérieur.

2. Étendue de livraison

L'étendue de livraison est la suivante :

1x appareil de signalisation

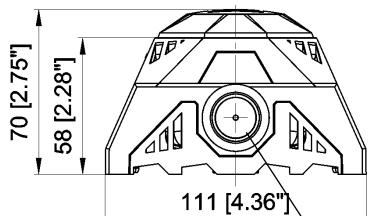

1x raccord fileté à membrane M20 (*en option : Presse-étoupe - fiche M12*)

1x joint pour le passage de câble inférieur

1x notice abrégée

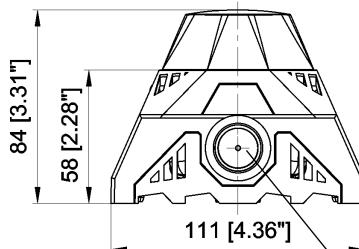

3. Dimensions

PA 1-R

Encoche préparée pour le M20

PA L 1-R

4. Données techniques

4.1 Généralités

	PA 1-R	PA L 1-R
Intensité lumineuse	-	16 cd (clair)
Source lumineuse	-	20x RGBW
Couleurs DEL RGBW	-	bleu, rouge, vert, jaune, orange, violet, magenta Également disponible via une commande externe : blanc
Niveau sonore maximal	105 dB (A) @1m, son DIN (son n° 2)	
Réglage du volume sonore		max. - 20 dB
Tonalités		70
Facteur de marche		100 %
Bornes	0,14 - 1,5mm ² à fil fin / unifilaire / AWG24 - AWG 14	
Type de protection		IP 66 (EN 60529), type 4 & 4x
Résistance aux chocs	IK08	IK07
Classe de protection		II
Température de service	-25 °C...+50 °C (voir la certification UL page 3, chapitre rédigé en anglais)	
Température de stockage		-25 °C... +70 °C
Humidité relative max.		90 %
Entrée de câble	1x M20 avec empreinte préalable, 1x 10 mm avec empreinte préalable	
Zone d'étanchéité du passe-fil	7 – 13 mm	En cas d'utilisation de câbles de diamètre < 7 mm, prévoir un presse-étoupe d'un indice de protection suffisant
Matériau du boîtier		PC / ABS
Matériau du capot	PC/ABS	PC Makrolon
Position de montage		Au choix
Couleurs du capot	--	transparent, blanc, jaune, orange, rouge, vert, bleu Version RGBW : blanc

4.2 Caractéristiques électriques version c.a. / version c.c.

	PA L 1-R					
Plage de tensions assignées (pour les limites, voir Homologations)	12 V - 48 V c.c.			24 - 48 V c.a. 50/60 Hz	115 V - 230 V c.a. 50/60 Hz	
Plage de tensions de service	10 V - 60 V c.c.			18 V – 53 V c.a.	95 V - 253 V c.a.	
	12 V c.c.	24 V c.c.	48 V c.c.	24 V c.a.	48 V c.a.	115 V c.a. 230 V c.a.
Consommation de courant assignée feux (max.)	450 mA	210 mA	115 mA	210 mA	115 mA	100 mA
Consommation de courant assignée sirène (max.)	375 mA	170 mA	100 mA	245 mA	175 mA	70 mA
Puissance absorbée (max.)	9,9 W	9,2 W	10,4 W			
	PA 1-R

Plage de tensions de service	10 V - 60 V c.c.			18 V – 53 V c.a.	95 V - 253 V c.a.	
Consommation de courant assignée (max.)	12 V c.c.	24 V c.c.	48 V c.c.	24 V c.a.	48 V c.a.	115 V c.a. 230 V c.a.
	375 mA	170 mA	100 mA	245 mA	175 mA	70 mA
Puissance absorbée (max.)	4,5 W	4,1 W	4,8 W			

5. Admissions

(Les admissions sont valables pour les appareils signalés)

UL, cUL
En préparation

6. Mise en service

6.1 Consignes de sécurité

DANGER - Danger de mort par décharge électrique

Les appareils sous tension et les câbles de raccordement dénudés peuvent provoquer des décharges électriques et des accidents graves.

- Les travaux sur les branchements électriques ne peuvent être effectués que par des professionnels agréés, formés en électrotechnique.
- Avant le montage, veuillez débrancher tous les câbles d'alimentation électrique et veillez à ce que le courant ne soit pas rétabli. Contrôler systématiquement l'absence de tension.
- Attendre la fin de la phase de décharge de 5 minutes pour les composants électriques. Ne pas ouvrir l'appareil auparavant.
- La tension de service ne doit être appliquée que lorsque le boîtier est solidement fermé.

AVERTISSEMENT – Danger en cas d'utilisation non conforme des appareils

Une utilisation non conforme peut entraîner des accidents graves.

- Lors de l'installation, s'assurer que le câble de raccordement est protégé contre la traction et la torsion.
- Les appareils sont uniquement destinés à une installation stationnaire.

DANGER - Risques liés à la détérioration des appareils

Le non-respect des indications de la plaque signalétique peut entraîner des accidents graves.

- Pendant l'installation et la maintenance des appareils, toujours observer les indications qui figurent sur la plaque de fabrication.

ATTENTION - Risque de blessures par des arêtes vives ou des composants chauds

- Pendant les travaux d'installation, de montage ou d'entretien / maintenance, porter l'équipement de protection individuelle (EPI) approprié.
- Poser les câbles à l'écart des arêtes vives, des coins et des composants internes, éviter toute collision avec les composants.

PRUDENCE - Risques d'altération de la vision

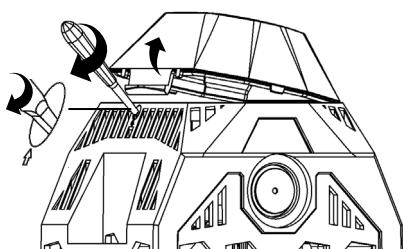

- Pour prévenir toute altération de la vision, éviter de regarder en permanence et directement le feu activé.
- Le déclenchement soudain du flash peut effrayer le personnel.

ATTENTION - Risques d'altération de l'ouïe

- Porter un équipement anti-bruit pour prévenir toute altération de l'ouïe pendant les travaux ou les tests.
- Le déclenchement soudain de la sirène peut effrayer le personnel.

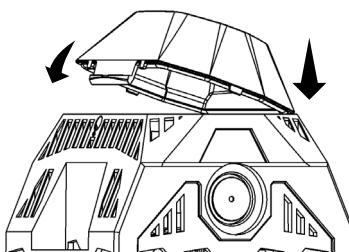

6.1 Fermeture du capot

Ouverture du capot

Introduire un tournevis (largeur de lame 3 mm) dans l'ouverture marquée et faire levier sur le couvercle en le tournant de 90°.

Fermeture du capot

Placer le capot sur le boîtier (veiller à ce qu'il ne tourne pas) et le fermer en exerçant une légère pression.

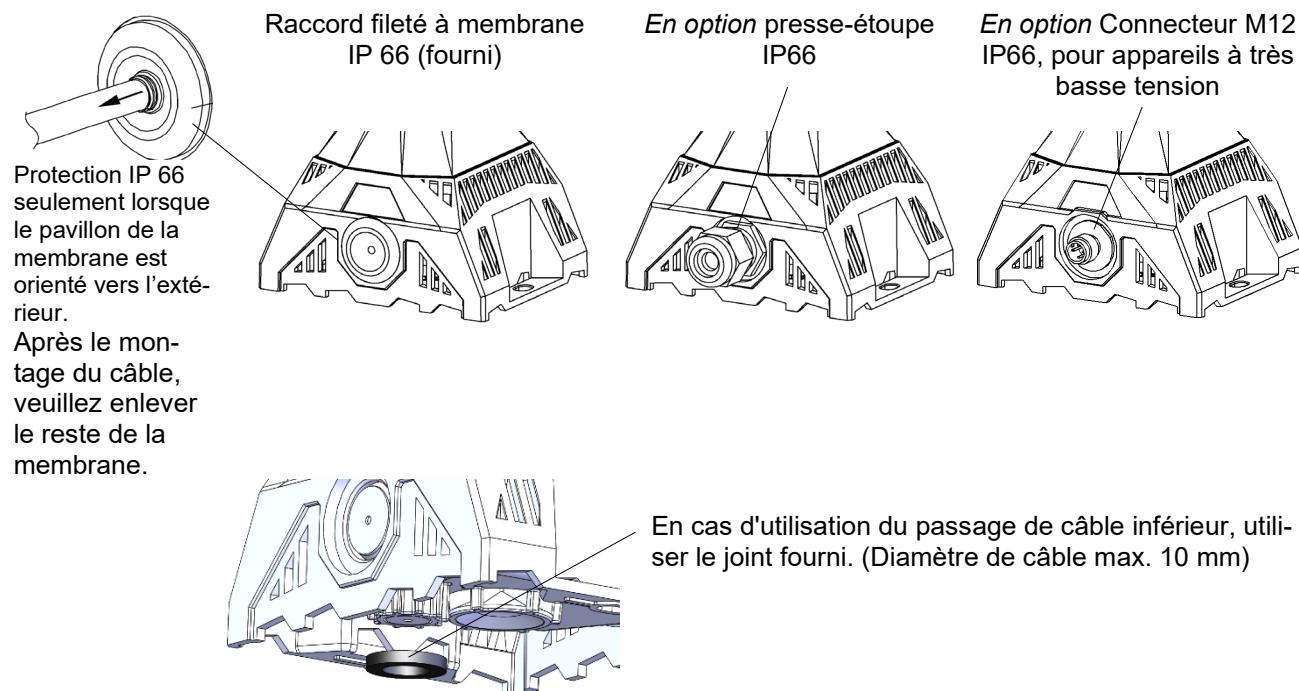

À la livraison, l'appareil n'est pas verrouillé.

Passage des câbles

Le raccord fileté à membrane fourni peut être remplacé par un presse-étoupe ou par un connecteur M12 avec une bride de dimension M20.

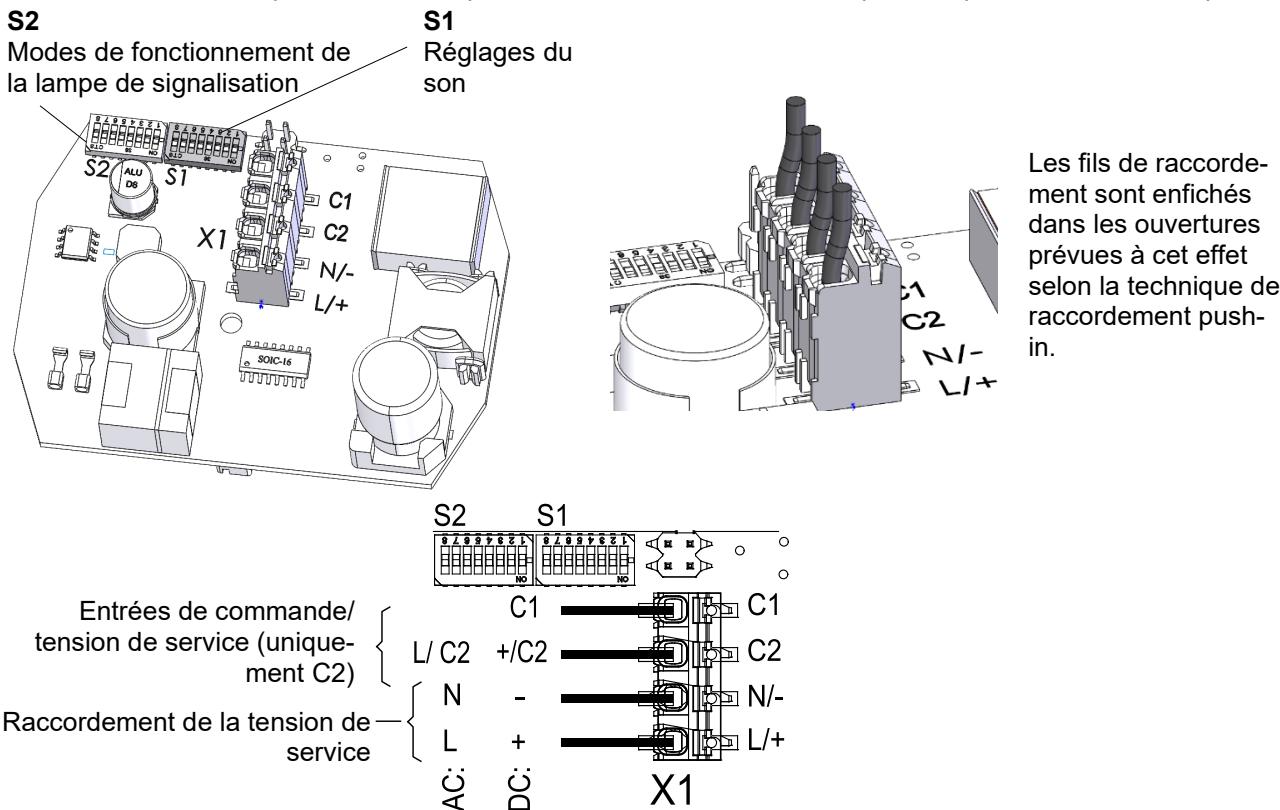

- Monter uniquement des presse-étoupes présentant un indice de protection supérieur ou égal à IP66 au niveau des perçages prévus à cet effet.

En cas d'utilisation de câbles de diamètre < 7 mm, prévoir un presse-étoupe d'un indice de protection suffisant.

6.2 Branchement électrique / Éléments de commande PA 1-R / PA L 1-R

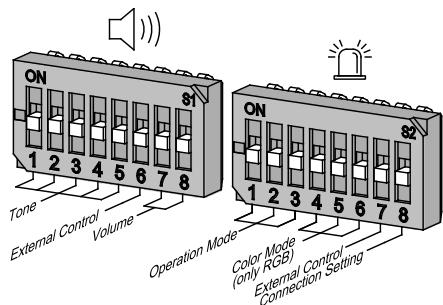

Le branchement électrique se fait sur la platine de raccordement, dans la partie supérieure / dans le capot.

6.3 Raccordement de la tension de service

Sur les appareils combinés PA L 1-R, les lampes de signalisation et les sirènes peuvent fonctionner séparément ou bien ensemble.

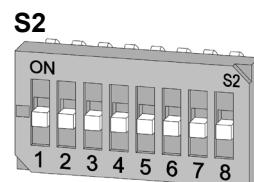

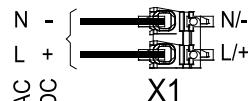

Positionner le commutateur DIP S2 sur la platine de raccordement comme suit :

Plus d'informations dans le QuickGuide

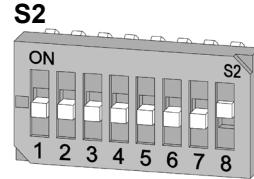

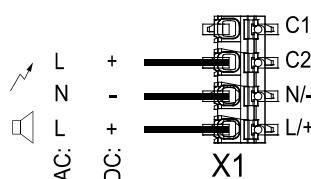

PA 1-R :
Raccordement de la tension de service

PA L 1-R : Alimentation commune de la lampe de signalisation et de la sirène

8. Accessoires

Référence	Description
28912000001	Joint de service PA (L) 1-R

9. Maintenance, entretien, réparation

- Tenez compte des [Consignes](#) de sécurité pour toutes les interventions sur l'appareil.

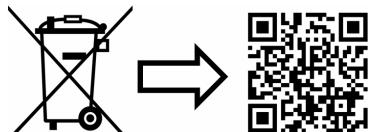

L'appareil ne nécessite aucune maintenance particulière.

- Pour le nettoyage extérieur, ne pas utiliser de produits abrasifs, contenant des solvants ou chimiquement agressifs.
Ne pas employer d'outils à arêtes vives, veiller notamment à ne pas rayer le capot lumineux.
Ne pas employer de nettoyeur haute pression.
- Tous les composants doivent être remplacés uniquement par des pièces d'origine.
- Les réparations doivent en principe être effectuées dans les ateliers du fabricant.

Toute transformation, modification, utilisation incorrecte ou interdite ainsi que le non-respect des instructions de service entraînent une exclusion de garantie.

10. Mise hors service, démontage et élimination

- Pour tous les travaux sur l'appareil, respecter [Consignes](#) de sécurité.

Appendice tabella delle tonalità

1. Utilizzo conforme alle disposizioni

I segnalatori acustici della serie PA sono indicati per la segnalazione degli stati di pericolo in ambienti industriali, commerciali e negli edifici. Se si utilizza la combinazione segnalazione acustica-luce di segnalazione (PA L 1-R) è possibile anche la segnalazione ottica.

I segnalatori acustici generano 70 diversi toni che è possibile selezionare attraverso l'interruttore interno. È possibile impostare un massimo di altri 3 toni attraverso il controllo esterno.

Utilizzare l'attrezzatura solo se non danneggiata e nel rispetto delle specifiche del cliente. Il funzionamento dell'attrezzatura è garantito solo se la parte superiore e quella inferiore sono montate in modo corretto.

I dispositivi sono adatti per l'uso in interni e in area esterna.

2. Fornitura

La fornitura comprende:

1 segnalatore

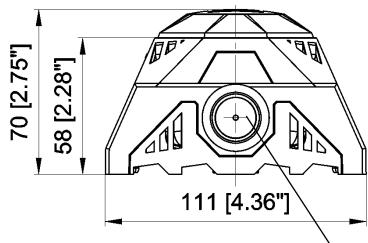

1 nipplo a membrana M20 (*opzionale: Pressacavo - connettore M12*)

1 guarnizione per passacavo inferiore

1 guida rapida

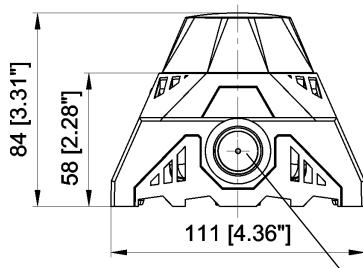

3. Dimensioni

PA 1-R

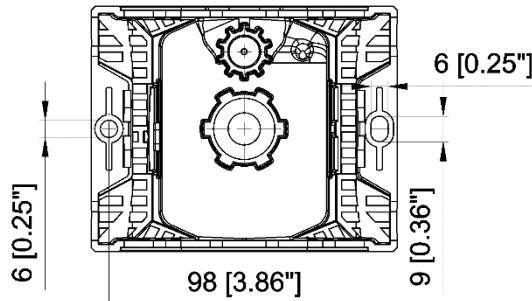

Predisposizione foro M20

PA L 1-R

Predisposizione foro M20

Utilizzare materiale di fissaggio adatto.

Schema fori; vista dal basso

4. Dati tecnici

4.1 Caratteristiche generali

	PA 1-R	PA L 1-R
Intensità della luce	-	16 cd (chiara)
Fonte	-	20x RGBW
LED colorati RGBW	-	blu, rosso, verde, giallo, arancione, viola, magenta inoltre tramite comando esterno: bianco
Pressione acustica max.	105 dB (A) @1m, tono DIN (tono n. 2)	
Regolazione del volume		max. - 20 dB
Toni		70
Fattore di servizio		100 %
Terminali di collegamento	0,14 - 1,5 mm ² filo sottile/filo singolo / AWG24 - AWG 14	
Grado di protezione		IP 66 (EN 60529), tipo 4 & 4x
Resistenza agli urti	IK08	IK07
Classe di protezione		II
Temperatura d'esercizio	-25 °C...+50 °C (omologazione UL v. pagina 3, capitolo in lingua inglese)	
Temperatura di stoccaggio		-25 °C...+70 °C
Umidità rel. max.		90 %
Ingresso cavi	1x M20 pre-goffrato, 1x 10 mm pre-goffrato	
Area di tenuta degli occhielli	7 – 13 mm	Se il diametro dei cavi è inferiore a 7 mm è necessario applicare un pressacavo con protezione adeguata
Materiale alloggiamento		PC / ABS
Materiale calotta	PC/ABS	PC Makrolon
Posizione di montaggio		A piacere
Colori calotta	--	trasparente, bianco, giallo, arancione, rosso, verde, blu Versione RGBW: bianco

4.2 Caratteristiche elettriche versione AC / versione DC

	PA L 1-R					
Campo di tensione nominale (limitazione vedi omologazione)	12V - 48V DC			24 - 48V AC 50/60Hz	115V - 230V AC 50/60Hz	
Campo tensione operativa	10V - 60V DC			18V – 53V AC	95V - 253V AC	
	12V DC	24V DC	48V DC	24V AC	48V AC	115V AC
Corrente nominale assorbita lampada (max)	450 mA	210 mA	115 mA	210 mA	115 mA	100 mA
Corrente nominale assorbita segnalatore acustico (max)	375 mA	170 mA	100 mA	245 mA	175 mA	70 mA
Potenza assorbita (max)	9,9 W	9,2 W	10,4 W			46 mA
	PA 1-R					
Campo di tensione nominale (limitazione vedi omologazione)	12V - 48V DC			24 - 48V AC 50/60Hz	115V - 230V AC 50/60Hz	
Campo tensione operativa	10V - 60V DC			18V – 53V AC	95V - 253V AC	
Corrente nominale assorbita (max)	12V DC	24V DC	48V DC	24V AC	48V AC	115V AC
	375 mA	170 mA	100 mA	245 mA	175 mA	70 mA
Potenza assorbita (max)	4,5 W	4,1 W	4,8 W			46 mA

5. Omologazioni

(Le omologazioni sono valide per le attrezzature contrassegnate)

UL, cUL
In corso

6. Messa in funzione

6.1 Istruzioni di sicurezza

PERICOLO - Scosse elettriche letali

Le parti sotto tensione e i cavi di collegamento liberi possono generare scosse elettriche causando gravi incidenti.

- Solo personale autorizzato e con formazione in elettrotecnica è autorizzato a eseguire interventi sui collegamenti elettrici.
- Prima del montaggio togliere tensione a tutte le linee in ingresso e metterle in sicurezza in modo che non possano riattivarsi. Accertarsi sempre che non ci sia tensione.
- Attendere 5 minuti affinché i componenti elettrici siano privi di tensione. Solo allora aprire il dispositivo.
- È possibile riattivare la tensione operativa solo con l'alloggiamento perfettamente chiuso.

AVVERTENZA - Pericolo per uso non conforme

L'uso non conforme dell'apparecchio può causare gravi incidenti.

- Durante l'installazione accertarsi che i cavi di collegamento non siano soggetti a trazione o torsione.
- L'apparecchio è progettato per installazioni fisse.

PERICOLO - Pericolo per danneggiamento dell'apparecchio

L'inosservanza dei dati sulla targa del tipo può causare gravi incidenti.

- Durante le operazioni di installazione e manutenzione dell'apparecchio osservare sempre i dati riportati sulla targhetta identificativa.

ATTENZIONE - Pericolo di lesioni per bordi taglienti o parti calde

- Durante le operazioni di installazione, montaggio o assistenza/manutenzione indossare dispositivi di protezione individuale (DPI) adatti.
- Realizzare i collegamenti lontano da bordi taglienti, spigoli o componenti interni, ed evitare di urtare contro componenti.

ATTENZIONE - Compromissione delle capacità visive

- Per non compromettere la vista, evitare di rivolgere lo sguardo direttamente alla luce continua attiva.
- L'improvvisa attivazione del lampeggio può causare reazioni di spavento.

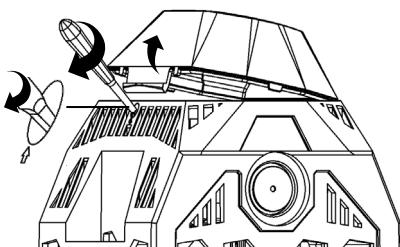

ATTENZIONE - Compromissione delle capacità uditive

- Al fine di evitare una compromissione delle capacità uditive, indossare sempre un'adeguata protezione acustica nel corso delle operazioni/dei test.
- L'improvvisa attivazione del segnale acustico può causare reazioni di spavento.

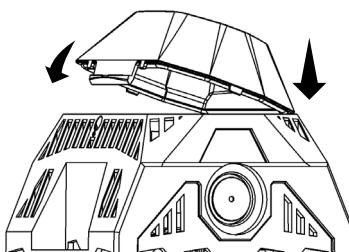

6.1 Chiusura della calotta

Apertura della calotta

Inserire un cacciavite (larghezza lama 3 mm) nell'apertura contrassegnata e sollevare il coperchio ruotandolo di 90°.

Chiusura della calotta

Poggiare la calotta sull'alloggiamento (prestare attenzione alla protezione antitorsione) e chiuderla esercitando una leggera pressione.

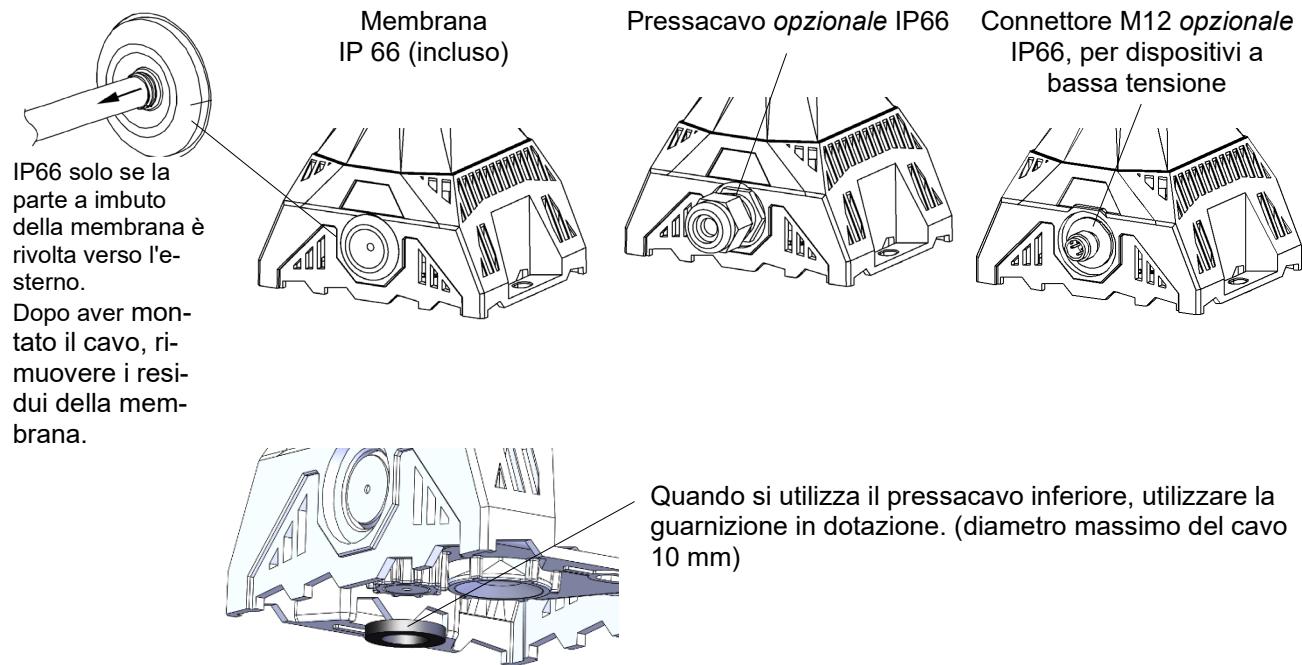

L'attrezzatura non viene fornita chiusa.

Ingressi dei cavi

La membrana compresa nella fornitura può essere sostituita da un pressacavo o da un connettore M12 con flangia M20.

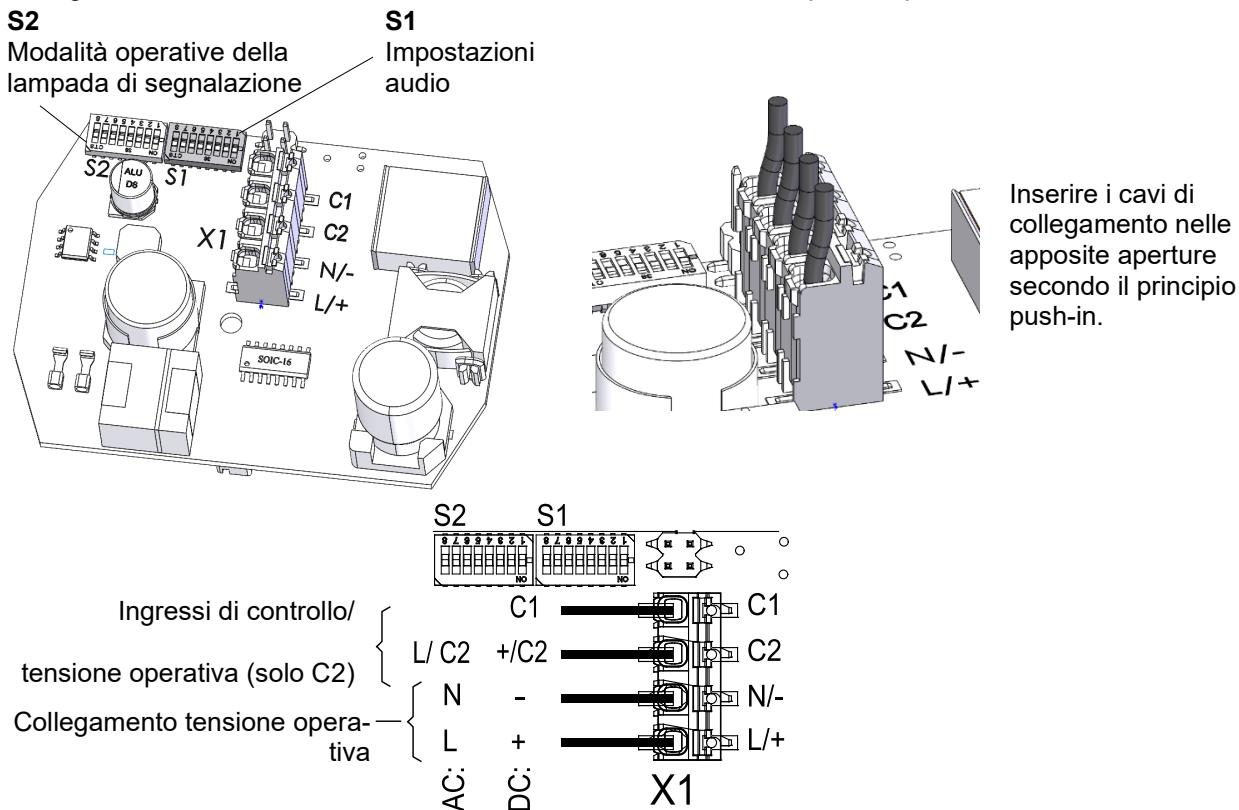

➤ Montare solo pressacavi con protezione minima IP66 e nelle apposite aperture.

Se il diametro del cavo è inferiore a 7 mm, usare un pressacavo con protezione adeguata.

6.2 Collegamento elettrico/elementi di controllo PA 1-R / PA L 1-R

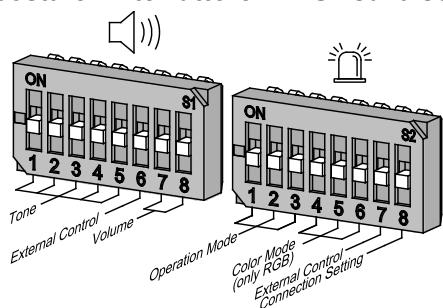

Il collegamento elettrico si effettua sulla scheda di connessione nella parte superiore/nella calotta.

6.3 Collegamento della tensione operativa

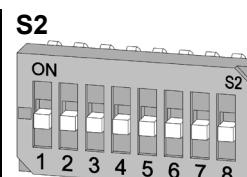

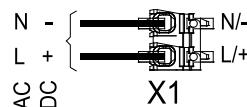

Con il dispositivo combinato PA L 1-R La lampada di segnalazione e il segnalatore acustico possono essere alimentati insieme o separatamente.

Impostare l'interruttore DIP S2 sulla scheda di connessione come segue:

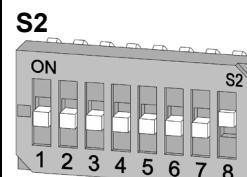

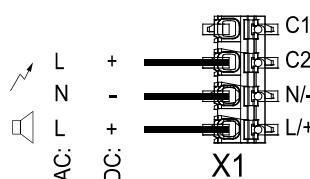

Ulteriori informazioni nella Guida rapida

PA 1-R:
Collegamento della tensione operativa
PA L 1-R: Alimentazione comune di lampada di segnalazione e segnalatore acustico

8. Accessori

N. art.	Denominazione
28912000001	Guarnizione di riserva PA (L) 1-R

9. Manutenzione, assistenza, riparazione

- Quando si eseguono interventi sull'apparecchio rispettare le [Istruzioni](#) di sicurezza.

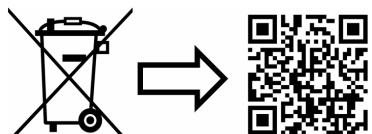

L'apparecchio non richiede una particolare manutenzione.

- Non utilizzare detergenti abrasivi, a base di solventi o chimicamente aggressivi per la pulizia esterna.
Per la pulizia non utilizzare attrezzi a spigoli vivi, in particolare non graffiare la calotta luminosa.
Non pulire con alta pressione.
- Sostituire i componenti con ricambi originali.
- Fare eseguire le riparazioni solo presso il fabbricante.

Interventi, modifiche, interventi errati e non consentiti insieme all'inosservanza delle istruzioni contenute nel presente manuale d'uso rendono nulla la garanzia.

10. Messa fuori servizio, smontaggio e smaltimento

- Per tutti i lavori sull'apparecchio rispettare [Istruzioni](#) di sicurezza.

Quadro-chave do anexo

1. Utilização prevista

As sirenes da série PA destinam-se a sinalizar, por exemplo, condições perigosas em áreas industriais, comerciais e de construção. Quando se utiliza a combinação siren/lâmpada de sinalização (PA L 1-R), existe também a opção de sinalização ótica.

As sirenes geram sinais acústicos em 70 tons diferentes, que podem ser selecionados através de um interruptor interno. É possível mudar para um máximo de 3 tons adicionais através de controlo externo.

Utilizar os aparelhos apenas em condições não danificadas e dentro das características especificadas. O funcionamento do aparelho apenas é garantido se as partes superior e inferior estiverem corretamente unidas. Os aparelhos são adequados para utilização no interior e no exterior.

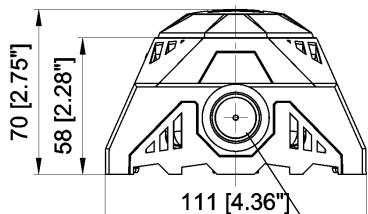

2. Âmbito de fornecimento

O âmbito da fornecimento é constituído por:

- 1x Dispositivo de sinalização
- 1x Bocal de membrana M20 (*Opcional: bucim - conector M12*)
- 1x Vedaçāo do bucim inferior
- 1x Guia rápido

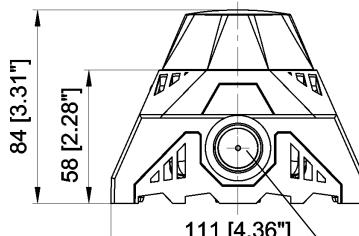

3. Dimensões

5. Autorizações

(As autorizações aplicam-se aos dispositivos rotulados)

UL, cUL

Em preparação

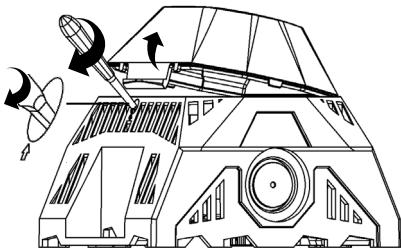

6. Colocação em funcionamento

6.1 Instruções de segurança

	PERIGO - Perigo de vida devido a choque elétrico Os aparelhos sob tensão e os cabos de ligação expostos podem provocar choques elétricos e acidentes graves. <ul style="list-style-type: none"> ➤ Os trabalhos nas ligações elétricas apenas devem ser executados por técnicos especializados e autorizados em eletricidade. ➤ Antes da instalação, desligar todas as linhas de alimentação e protegê-las contra uma ligação accidental. Certifique-se sempre de que não existe tensão. ➤ Aguardar 5 minutos para que os componentes elétricos se descarreguem. Apenas então abrir o aparelho. ➤ A tensão de funcionamento apenas deve ser aplicada quando a caixa está bem fechada.
	AVISO - Perigo devido a utilização não autorizada dos aparelhos A utilização incorreta pode conduzir a acidentes graves. <ul style="list-style-type: none"> ➤ Durante a instalação, o cabo de ligação deve estar protegido contra puxões e torções. ➤ Os aparelhos destinam-se exclusivamente a uma instalação fixa.
	PERIGO - Risco de danos nos aparelhos A inobservância das indicações da placa de características pode conduzir a acidentes graves. <ul style="list-style-type: none"> ➤ Para a instalação e manutenção dos aparelhos, respeitar sempre as indicações da placa de características.
	CUIDADO - Risco de ferimentos devido a arestas vivas ou componentes aquecidos <ul style="list-style-type: none"> ➤ Utilizar equipamento de proteção individual (EPI) adequado durante a instalação, montagem ou trabalhos de assistência/manutenção. ➤ Efetuar a cablagem longe de arestas vivas, cantos e componentes internos, evitar colisões com componentes.
	CUIDADO - Danos visuais <ul style="list-style-type: none"> ➤ Para evitar problemas de visão, evite sempre olhar diretamente para a luz ativada. ➤ O desencadeamento não mediado do flash pode levar a reações de sobressalto. CUIDADO - Danos auditivos <ul style="list-style-type: none"> ➤ Para evitar problemas de audição, usar equipamento de insonorização durante o trabalho/ensaio. ➤ O desencadeamento de sons não mediados pode levar a reações de sobressalto.

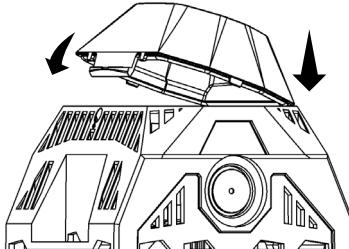

6.1 Fixação da tampa do compartimento

Abrir a tampa do compartimento

Introduzir uma chave de fendas (largura da lâmina 3 mm) na abertura marcada e retirar a tampa rodando-a 90°.

Fechar a tampa do compartimento

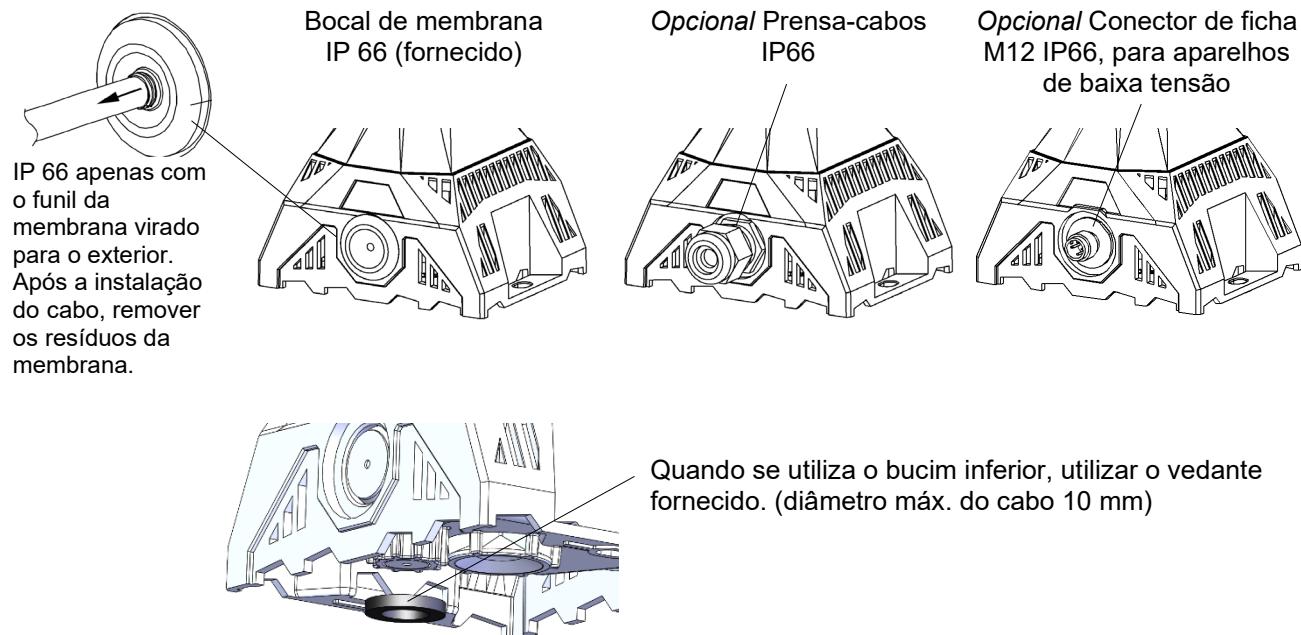

Colocar a tampa na caixa (certificar-se de que não está torcida) e fechar com uma leve pressão.

O aparelho é fornecido não vedado.

Buchas de cabos

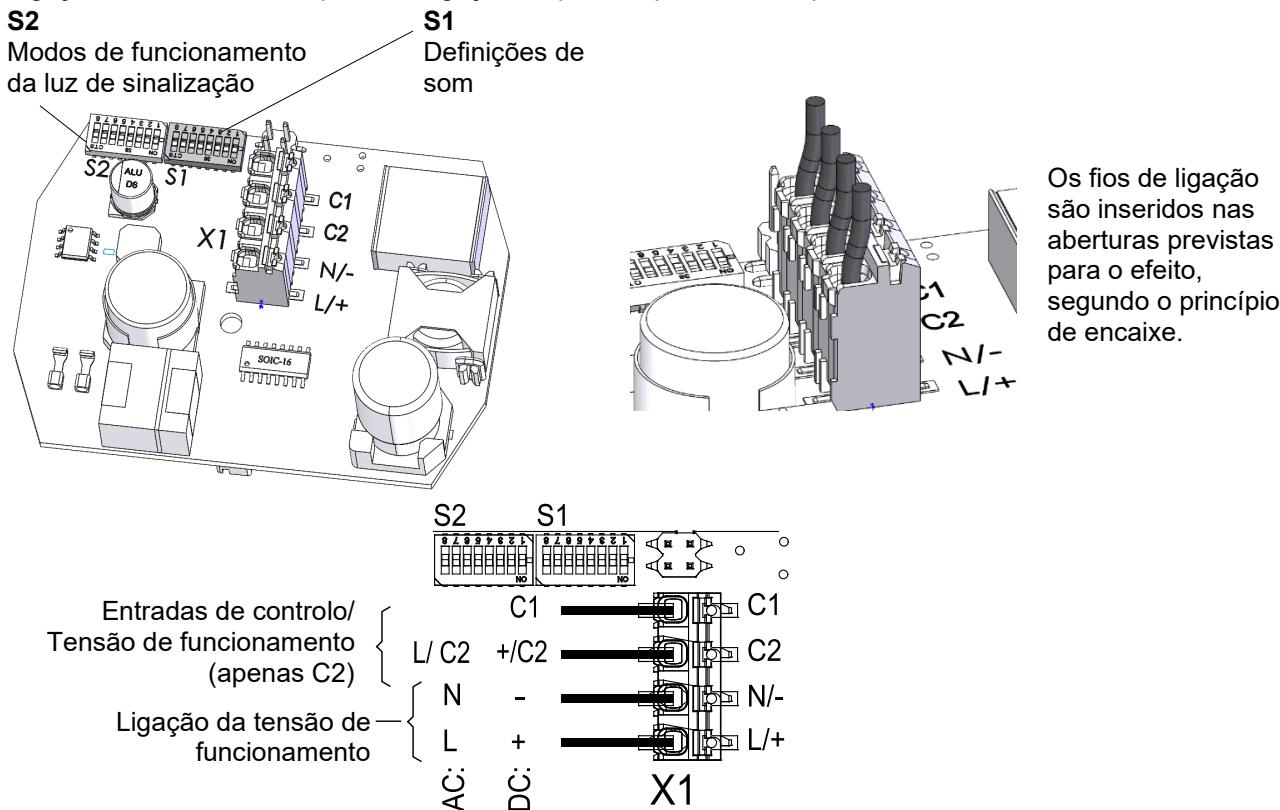

O bocal da membrana fornecido pode ser substituído por um bucim ou por uma ficha de ligação M12 com uma dimensão de flange de M20.

- Instalar apenas bucins com um grau de proteção de, pelo menos, IP66 nas aberturas correspondentes. Para diâmetros de cabo <7 mm, utilizar um bucim com um grau de proteção suficiente.

6.2 Ligação elétrica/elementos de funcionamento PA 1-R / PA L 1-R

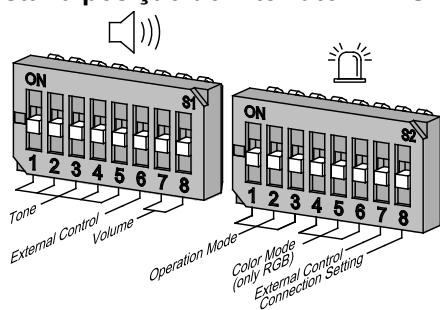

A ligação elétrica é feita na placa de ligação na parte superior/na tampa.

6.3 Ligação da tensão de funcionamento

Com o aparelho combinado PA L 1-R, a lâmpada de sinalização e a sirene podem ser fornecidas em conjunto ou separadamente.

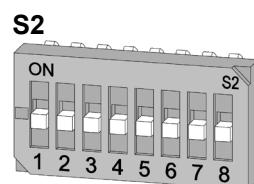

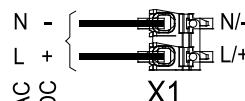

Ajustar a posição do interruptor DIP S2 na placa de ligação da seguinte forma:

8. Acessório

Artigo n.º	Designação
28912000001	Junta de substituição PA (L) 1-R

9. Manutenção, serviço, assistência técnica

- Durante os trabalhos no aparelho, devem ser tomadas em consideração as [Instruções](#) de segurança.

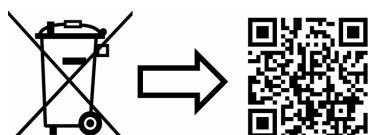

O aparelho não necessita de qualquer manutenção especial.

- Não utilizar produtos de limpeza abrasivos, à base de solventes ou quimicamente agressivos para a limpeza exterior.
- Não utilizar ferramentas com arestas vivas, especialmente para não riscar a cobertura da luz.
- Não limpar com alta pressão.
- Substituir os componentes apenas por peças sobresselentes originais.
- As reparações apenas podem ser efetuadas pelo fabricante.

As transformações, modificações, utilização incorreta ou não autorizada e o incumprimento das instruções deste manual de instruções invalidam a garantia.

10. Desativação, desmontagem e eliminação

- Durante os trabalhos no aparelho, devem ser tomadas em consideração as [Instruções](#) de segurança.

Приложение Таблица звуковых тонов

1. Применение по назначению

Излучатели звука серии PA предназначены для сигнализации, например, опасных состояний в промышленности, торговле и строительстве. При использовании комбинации излучателя звука и сигнальных ламп (PA L 1-R) существует дополнительно возможность визуальной сигнализации.

Излучатели звука воспроизводят акустические сигналы 70 различных звуковых тонов, которые можно выбирать с помощью внутреннего переключателя. Имеется возможность с помощью внешнего управления осуществлять переключение еще на макс. 3 звуковых тона.

Эксплуатировать устройства только в исправном состоянии в пределах указанных параметров. Функционирование устройства гарантируется только при правильной сборке верхней и нижней частей. Устройства пригодны для внутреннего и наружного использования.

2. Объем поставки

Объем поставки состоит из:

1x сигнальное устройство

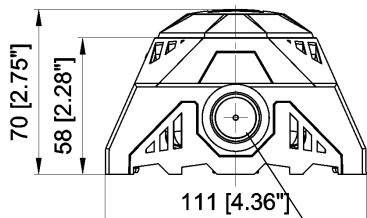

1x мембранный ниппель M20 (опционно: Уплотнительный кабельный ввод – штекер M12)

1x уплотнение для нижнего кабельного ввода

1x краткое руководство

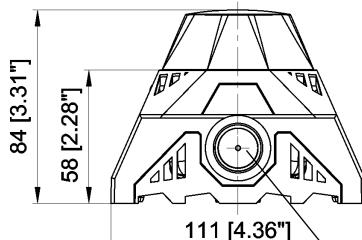

3. Габаритные размеры

РА 1-R

Отверстие M20 подготовлено

РА L 1-R

Отверстие M20 подготовлено

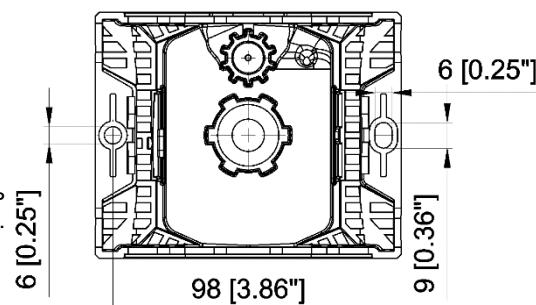

Схема расположения отверстий; вид снизу

4. Технические данные

4.1 Общие данные

	РА 1-R	РА L 1-R
Сила света	-	16 cd (светлый)
Источник света	-	20x RGBW
Цвета светодиода RGBW	-	синий, красный, зеленый, желтый, оранжевый, фиолетовый, магента дополнительно с помощью внешнего управления: белый
Макс. уровень звука	105 дБ (A) на расстоянии 1 м, тон по DIN (тон № 2)	
Регулировка громкости	макс. - 20 дБ	
Звуковые тоны	70	
Продолжительность включения	100 процентов	
Соединительные зажимы	0,14 - 1,5 мм ² тонкопроволочный / одножильный / AWG24 - AWG 14	
Степень защиты	IP 66 (EN 60529), тип 4 и 4x	
Ударная прочность	IK08	IK07
Класс защиты	II	
Рабочая температура	-25 °C...+50 °C (UI-допуск см. стр. 3, раздел на английском языке)	
Температура хранения	-25 °C...+70 °C	
Макс. относительная влажность воздуха	90 процентов	
Кабельный ввод	1x M20 выполнен, 1x 10 мм выполнен	
Зона уплотнения проходной втулки	7 – 13 мм	При использовании кабелей диаметром < 7 мм предусмотреть кабельный ввод с достаточной степенью защиты
Материал корпуса	ПК / сополимер АБС	
Материал колпака	ПК / сополимер АБС	ПК Makrolon
Монтажное положение	любое	
Цвета колпака	--	прозрачный, белый, желтый, оранжевый, красный, зеленый, синий Версия RGBW: белый

4.2 Электрические параметры, версия переменного / постоянного тока

	PA L 1-R					
Номинальный диапазон напряжений (ограничения см. разрешение)	12 В - 48 В пост. тока			24 - 48 В перемен. тока 50/60 Гц	115 В - 230 В перемен. тока 50/60 Гц	
Диапазон рабочего напряжения	10 В - 60 В пост. тока			18 В – 53 В перемен. тока	95 В - 253 В перемен. тока

5. Разрешения

(Разрешения действительны для отмеченных устройств)

UL, cUL

На стадии подготовки

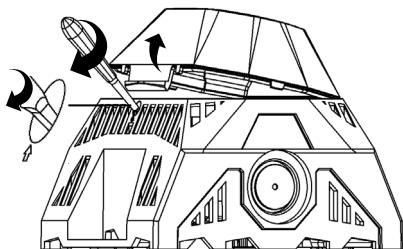

6. Ввод в эксплуатацию

6.1 Указания по технике безопасности

	<p>ОПАСНОСТЬ - Опасность для жизни в результате поражения электрическим током</p> <p>Находящиеся под напряжением устройства и открытые соединительные линии создают опасность поражения электрическим током и могут вызывать тяжелые несчастные случаи.</p> <ul style="list-style-type: none"> ➤ Работы над подключениями к электросети разрешается выполнять только обученным и авторизованным специалистам-электрикам. ➤ Перед монтажом все подводящие линии необходимо обесточить и заблокировать от повторного включения. Необходимо всегда удостоверяться в отсутствии напряжения. ➤ Выждать фазу разряда электрических компонентов длительностью 5 минут. Лишь затем открывать устройство. ➤ Включение рабочего напряжения должно производиться только при плотно закрытом корпусе.
	<p>ПРЕДОСТЕРЖЕНИЕ! Опасность в результате недопустимого применения устройств</p> <p>Применение не по назначению может привести к тяжелым авариям.</p> <ul style="list-style-type: none"> ➤ Во время монтажа следить за тем, чтобы соединительный провод был защищен от растяжения и перекручивания. ➤ Устройства предназначены исключительно для стационарного монтажа.
	<p>ОПАСНОСТЬ - Опасность в результате повреждения устройств</p> <p>Несоблюдение данных заводской таблички может привести к тяжелым авариям.</p> <ul style="list-style-type: none"> ➤ При установке и техническом обслуживании устройств следует всегда учитывать данные на типовой табличке.
	<p>ВНИМАНИЕ! Опасность травмирования острыми кромками или горячими деталями</p> <ul style="list-style-type: none"> ➤ Используйте подходящие средства индивидуальной защиты (СИЗ) для установки, сборки или обслуживания/технического обслуживания. ➤ Разводку кабелей выполнять вдали от острых кромок, углов и внутренних компонентов, избегать столкновений с компонентами.
	<p>ВНИМАНИЕ! Опасность ухудшения зрения</p> <ul style="list-style-type: none"> ➤ Чтобы не допустить ухудшения зрения, избегать длительного прямого зрительного контакта с включенной лампой. ➤ Внезапное срабатывание вспышки может привести к реакциям испуга.
	<p>ВНИМАНИЕ! Опасность ухудшения слуха</p> <ul style="list-style-type: none"> ➤ Чтобы предотвратить ухудшение слуха, используйте средства защиты от шума во время работы / тестирования. ➤ Внезапное срабатывание звукового сигнала может привести к реакциям испуга.

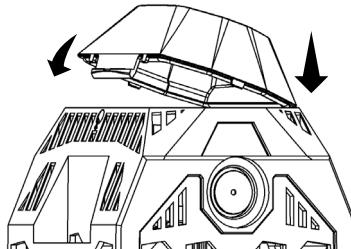

6.1 Открытие и закрытие колпака

Открытие колпака

Установите отвертку (ширина наконечника 3 мм) в обозначенное отверстие и поверните ее на 90 ° для подъема колпака.

Закрытие колпака

Установите колпак на корпус (не перепутайте положение!) и закройте его путем легкого нажатия.

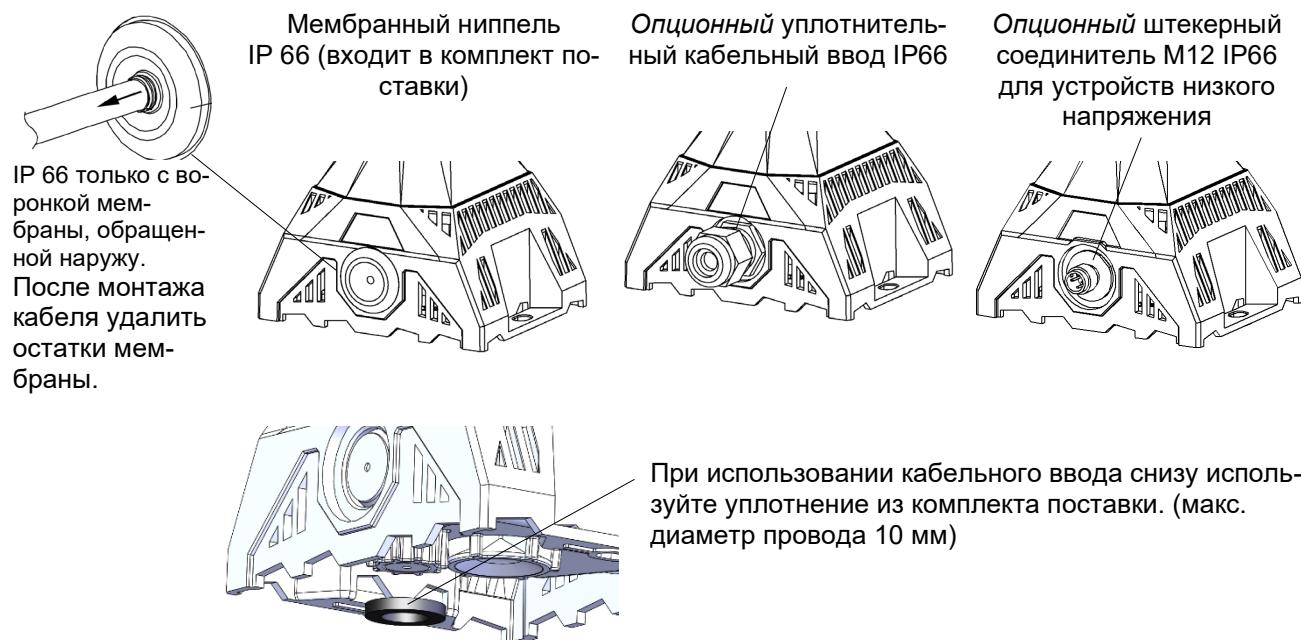

Устройство поставляется в незакрытом состоянии.

Уплотнительные кабельные вводы

Входящий в комплект поставки мембранный ниппель можно заменить уплотнительным кабельным вводом или штекерным соединителем M12 с размером фланца M20.

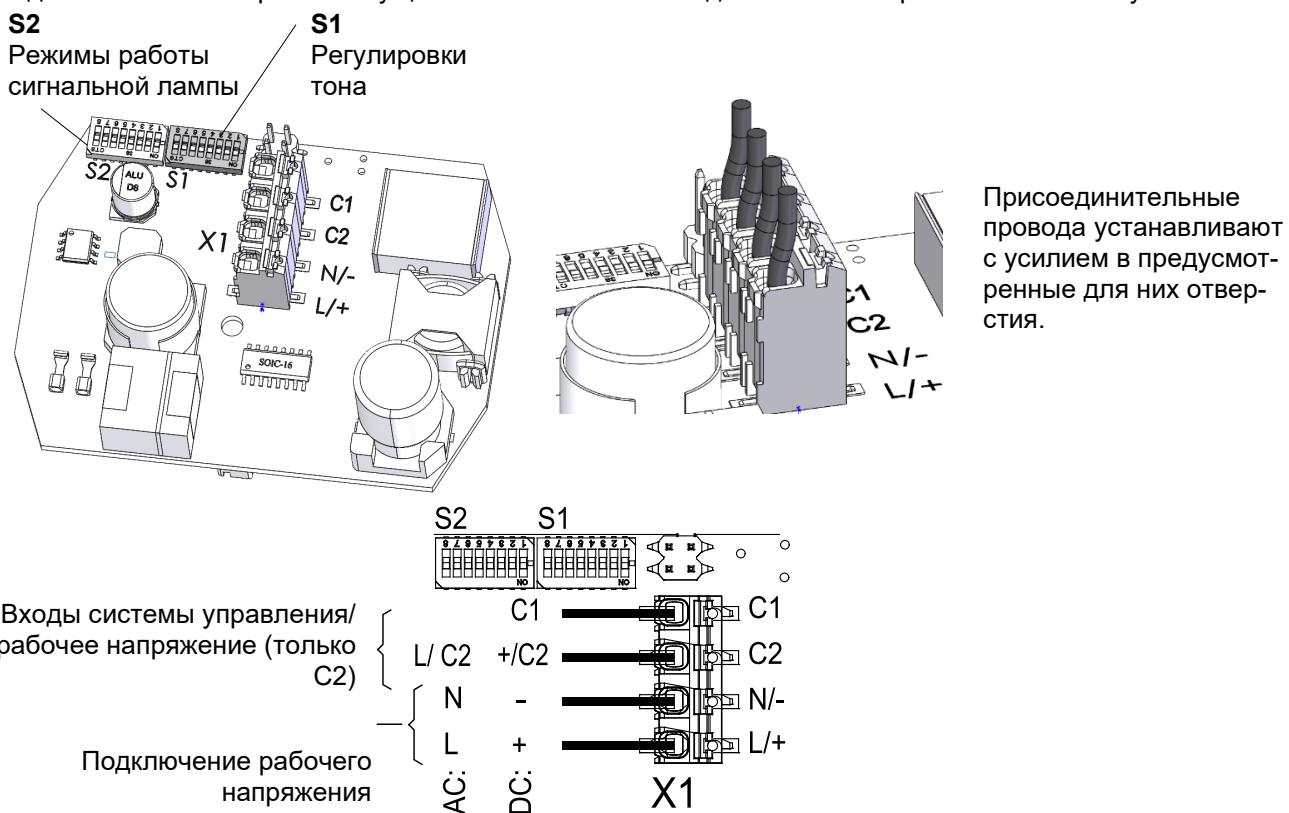

- Монтировать только кабельные вводы со степенью защиты минимум IP66 в соответствующих отверстиях.

В случае кабелей диаметром < 7 мм использовать уплотнительный кабельный ввод с достаточной степенью защиты.

6.2 Электрическое подключение / элементы управления PA 1-R/ PA L 1-R

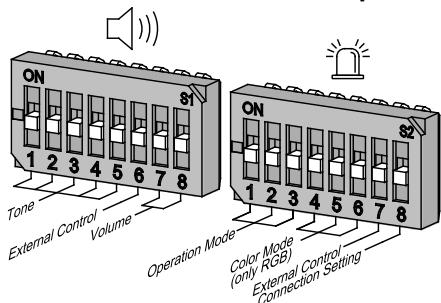

Подключение к электросети осуществляется на плате подключения в верхней части/ в кожухе.

6.3 Подключение рабочего напряжения

В комбинированных устройствах PA L 1-R питание сигнальной лампы и излучателя звука может осуществляться вместе или раздельно.

Установить положения DIP-переключателей S2 на панели подключения следующим образом:

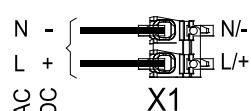

Дополнительную информацию см. в Краткой инструкции

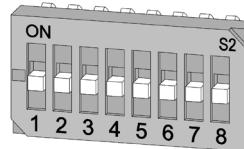

PA 1-R:

Подключение рабочего напряжения

PA L 1-R: Совместное питание сигнальной лампы и излучателя звука

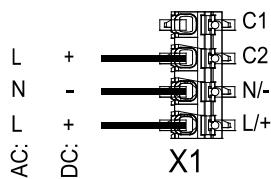

S2

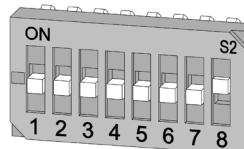

S2: все выключатели в положении «выключено»
Заводская установка*

PA L 1-R:

Раздельное питание сигнальной лампы и излучателя звука

S2

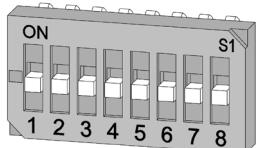

S2: Выключатель 8 в положении «включено»

6.4 Установка режимов работы без внешней системы управления

6.4.1 Регулировка звуковых тонов

С помощью переключателя **S1** на панели в колпаке устанавливают тон звука, см. таблицу ниже.

6.4.2 Регулировка цвета (только РА L 1-R)

С помощью переключателя **S2** на панели в колпаке устанавливают цвет, см. таблицу ниже.

S2 (DIP2)					Режим цвета (только RGB)
4	5	6	7	8	
ВКЛ					Красный *
	ВКЛ				Желтый
ВКЛ	ВКЛ				Оранжевый
		ВКЛ			Белый
ВКЛ	ВКЛ				Зеленый
	ВКЛ	ВКЛ			Синий
ВКЛ	ВКЛ	ВКЛ			Фиолетовый
	ВКЛ	ВКЛ			Магента

6.4.3 Установка режима работы (только РА L 1-R)

С помощью переключателя **S2** на панели в колпаке устанавливают режим работы, см. таблицу ниже.

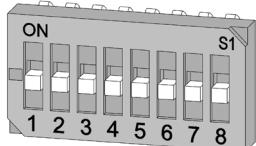

S2 (DIP2)			Режим работы
1	2	3	
			Вспышка 1 Гц*
ВКЛ			Вспышка 2 Гц
	ВКЛ		Вспышка 1 Гц DF**
ВКЛ	ВКЛ		Мигающий свет 0,5 Гц
	ВКЛ		Мигающий свет 1 Гц
ВКЛ	ВКЛ		Мигающий свет 2 Гц
	ВКЛ	ВКЛ	Постоянный свет
ВКЛ	ВКЛ	ВКЛ	Поворотная лампа 180 об/мин

DF** = двойная вспышка

6.5 Установка режимов работы с внешней системой управления

6.5.1 Регулировка звуковых тонов

С помощью переключателя **S1** на панели в колпаке устанавливают тон звука, см. таблицу ниже.

S1

Заводская установка*

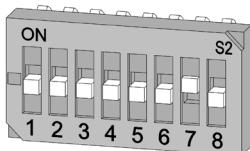

S1(DIP1)		Громкость
7	8	дБ
		макс.*
ВКЛ		-7
	ВКЛ	-13
ВКЛ	ВКЛ	-20

Заводская установка*

С внешним управлением

8. Дополнительные принадлежности

Номер артикула	Обозначение
28912000001	Запасное уплотнение PA (L) 1-R

9. Техническое обслуживание, сервис, поддержание в исправном состоянии

- При выполнении любых работ на устройстве соблюдать [Указания](#) по технике безопасности.

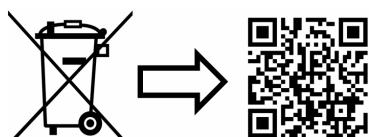

Устройство не требует специального обслуживания.

- Не используйте для наружной очистки абразивные, содержащие растворители или химически агрессивные средства очистки.
- Не используйте инструменты с острыми краями, соблюдайте особую осторожность при очистке бленды и не поцарапайте ее.
- Не используйте для очистки высокое давление.
- Замена компонентов только на оригинальные запасные части.
- Выполнение ремонта принципиально поручать проводить только на заводе-изготовителе.

Модификации, изменения, неправильное и недопустимое использование, а также несоблюдение указаний, приведенных в данном руководстве по эксплуатации, исключают гарантийные обязательства.

10. Вывод из эксплуатации, демонтаж и утилизация

- При выполнении любых работ на устройстве соблюдать [Указания](#) по технике безопасности.
