IMPORTANT:

- all sections must be suspended individually and perfectly levelled (horizontally and vertically) before connecting them together - this is crucial
- all suspension cords must be positioned perfectly vertical
- all suspension cords must be tensioned with the same strength
- if these conditions are not satisfied then the different parts will settle to different levels and work against one another.

11. Maximum current load allowed to through-wiring is 13A.
Non-user replaceable light source.
